

# We can solve your power cleaning needs!

Printed on Recycled Paper

## **Green Earth Eco-Friendly Powerwashing & Recovery**

understands the environmental concerns today's business owners and homeowners face.

For that reason, we offer a water recovery service for commercial and residential properties in the South Florida area. What sets us apart from most others in the industry is our "green" approach. We use re-cycled water (both hot and cold) and eco-friendly cleaning solutions. We also supply our own clean water when a water source is not available.

Our specialized, state-of-the-art equipment allows us to **recover, recycle & reuse** waste water (on most projects) dramatically reducing water usage while saving our precious resource. Our process will not harm your lawn, shrubs or trees.

**Fully licensed, insured & bonded.**

**Competitive pricing with quality results. Satisfaction guaranteed.**

**Give us a call or go to [www.greenearthpowerwash.com](http://www.greenearthpowerwash.com) today!**
